```

Exercise 3: Arithmetic

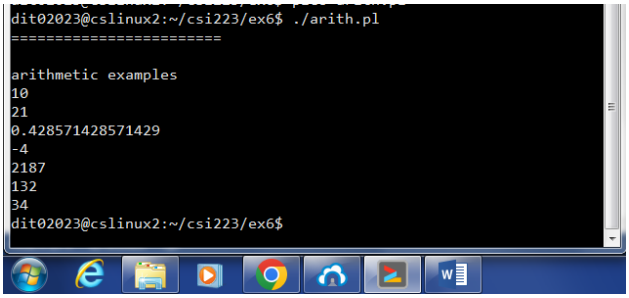

The code had errors.

The print in line number 5 was not recognized as it was in the same line as another print statement.

AFTER CORRECTING THE CODE

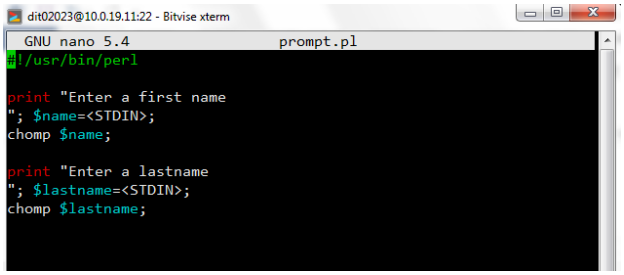

Output:

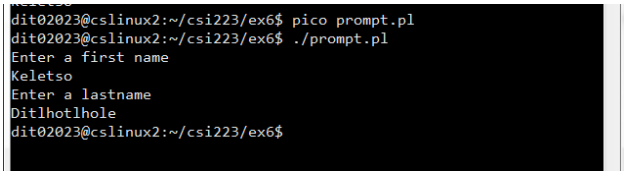

The “\n” in line two skips a line before outputting “arithmetic examples”.

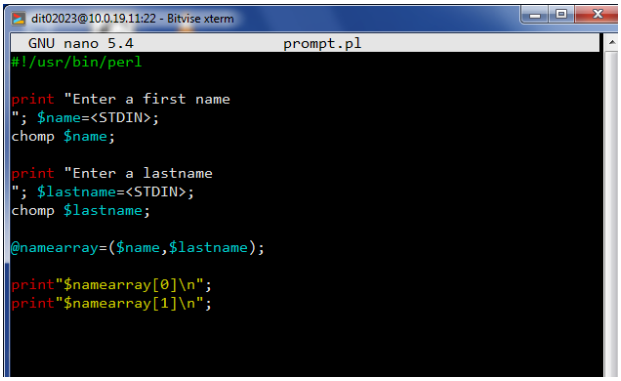

Exercise 5: Variables

i.

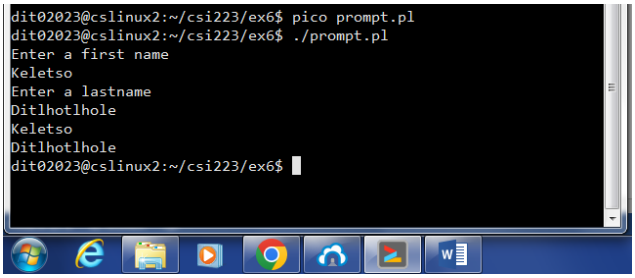

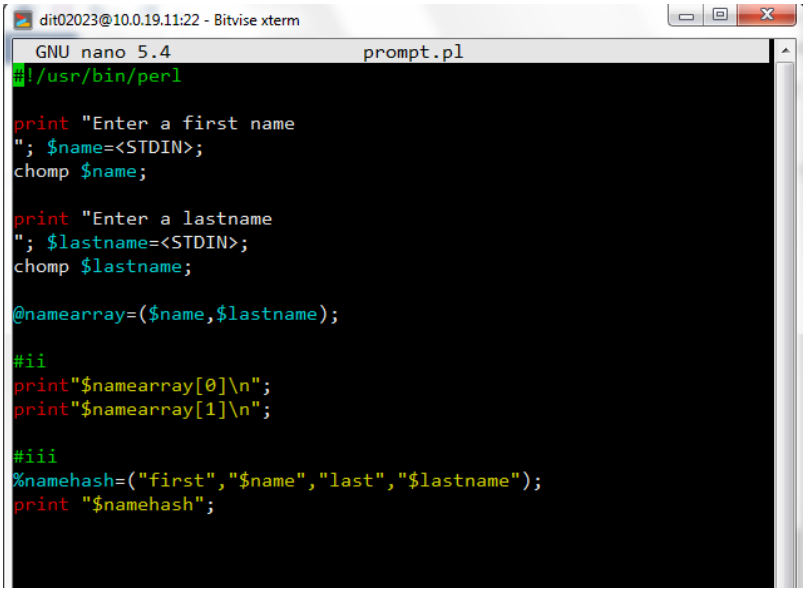

ii.

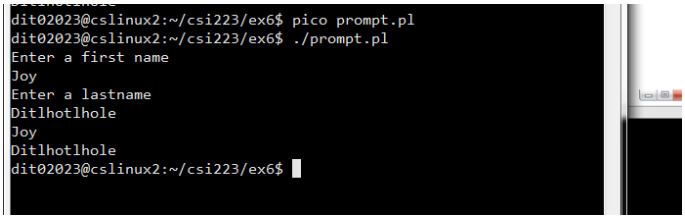

Output:

iii.

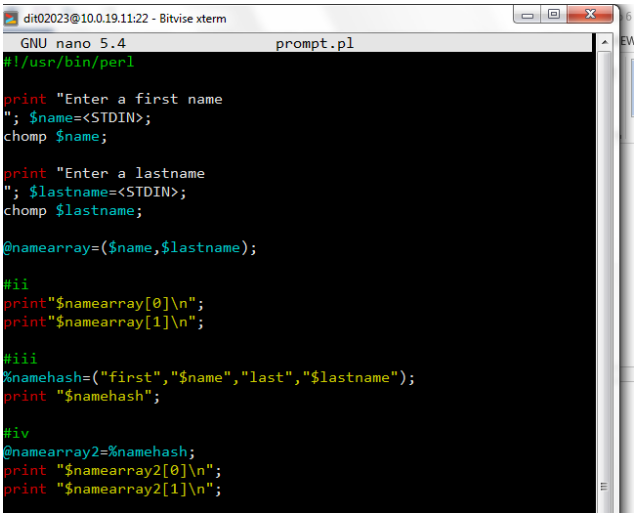

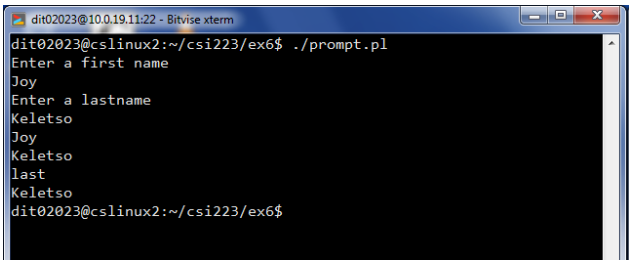

Output:

You cannot print hashes the same way you can resolute scalar variables in perl.

iv.

Instead of printing,

Joy

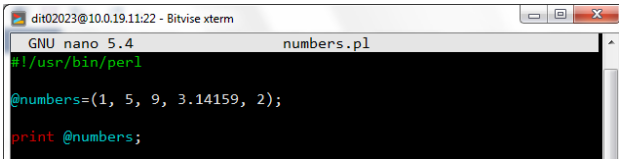

Keletso

It prints the key and value of the last element.

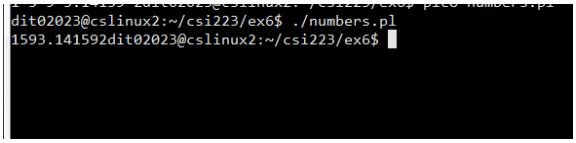

Exercise 5: Arrays

i.

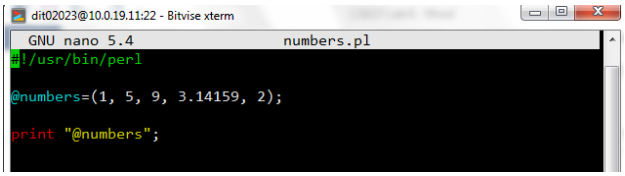

Without interpolation

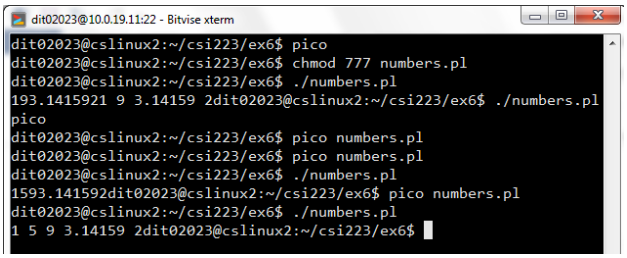

Output:

With interpolation

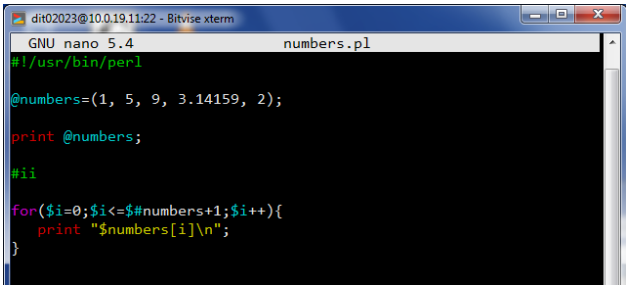

Output:

- With interpolation creates spaces between numbers while without interpolation does not space the numbers.

ii.

iii. ‘\n’ prints a new line for characters while “\n” prints a new line for strings.
